You can refer to the following blog article to know more details about how click-to-run Office is updated: Hope this helps.. Regards, Steve Fan Please remember to mark the replies as answers if they helped.. This is a history of Microsoft Office and its versions First version to use the new Ribbon user interface with tabbed menus.. All versions of Microsoft Office products before Microsoft Office 2016 are eligible for ten years of support following their release.. Now, how to check if I have the latest version Microsoft talks about KBnnnnnn whereas Office shows a real version# like 16.

In the list of updates, locate and select KB3085435, and then select Uninstall In the list of updates there are no Office updates and neither something containing a kind of KB# 6 entries, some Windows and Visual C++ updates, but no office.. The latter is updated through Windows Update with KB update packages While click-to-run Office usually automatically updates directly from Microsoft server and no update history would be recorded in Microsoft Update of Control Panel.. My version of Office is uptodate, at least They updater tells me so, when doing a check for update.. I end up in a maze up KB# version# this leaving me puzzled whether or not I have the lastest Office installed, even though the updater tells me so.. I am using Office 2016 with automatic update Within Excel 2016 there is a new function. [elm327 free abs software](#)
